

Sharing my experience

RED LATINOAMERICANA

Attending this conference was a very enriching experience. The exchange with families and professionals from all over the world increased my knowledge about SPW, and I will be able to spread the latest news to our Argentinian SPW community. In this way, we hope to improve our children life quality.

The presentation of a Latin-American net is a big opportunity for all the families that can't find experienced professionals.

This is a recurrent problem for patients in Argentina and is something that the Argentinian association was expecting for.

Dr. Gourash's talk about the skills that families and caregivers need for communication was very enriching.

DRA LINDA GOURASH

Interesting information about the studies of drugs in phase 3 was shared. I am returning home with some great news!.

It was fun to meet and share beautiful moments with people so important and committed to our struggle.

We also had fun with a great person, Amalia Balart.

THANK YOU!!!

For the good times and the excellent information and we will share it with the families through the networks, meetings and talks of the Association that I represent.

Greetings.

SANDRA COSTI.
(ARGENTINA)
